

1. Master as data carriers

Unless there is a note indicating otherwise, we principally receive each CD/CDR or DVD/DVDR as directly replicable master!

Data carriers

- Industrially pressed CD/DVD without copy protection
- CDR / DVDR
 - CD master as CDR
 - DVD5 master as DVDR
 - DVD9 master as DVDR Dual Layer

2. Master as image file

- Only image files which are directly burnable or capable of being used as a master will be accepted. Open file structures require a separate project, please contact our distribution department.
- The images files must be packed in ZIP or SIT format.

File formats

- DDP2 Image
- Nero Image
- ISO Image

Data carriers and data transmission

- Tape
 - DVD5 / DVD9 as DLT
 - DLT-III / DLT-III XT / DLT-IV
 - Supported drive models: DLT-1 (VS-80); DLT-4000; DLT-8000
- CDR / DVDR see no #1 above "Master as data carriers", there is a note for our distribution department necessary
- Internet FTP

3. Transmission of image files via Internet / FTP

- For delivery by FTP, please use our FTP server ([ftp.cda.de](ftp://ftp.cda.de))
- We will give you an FTP access upon request
- Save files and folders with a meaningful name corresponding to the order
- All file names without special characters
- A test should be performed before the first Internet transmission of a master or image
